Sheridan College, Oakville ON
- **Relevant Courses:** Object-oriented programming, Data Structures and algorithms, Enterprise Software Development, Web Development

WORK EXPERIENCE

Programmer Intern   Sep 2022 – Dec 2022
Town of Oakville, ON, CA
- Designed and developed software solutions using Visual Studio and ASP.NET core, integrating SharePoint for increased functionality, resulting in improved performance and increased user satisfaction.
- Managed code repositories using Microsoft Azure DevOps, ensuring code versioning and integrity, resulting in improved collaboration and streamlined development processes.
- Documented solutions and conducted knowledge transfer to the development team, resulting in enhanced team capabilities and improved efficiency.

Cloud Platform Analyst Intern   Jan 2022 – May 2022
Softchoice, ON, CA
- Analyzed software used by the company and identified areas for improvement, resulting in increased efficiency and productivity.
- Conducted interviews with clients and employees to gather business requirements for an upcoming project, using feedback to inform decision-making and ensure client satisfaction.
- Collaborated with a team to provide clients with practical and innovative cloud-based solutions, ensuring seamless integration and optimal performance.

PROJECTS

Word Search Puzzle Generator (Website) (GitHub)   Aug 2022
- Designed and developed a Java Spring Boot application utilizing MySQL database and Bootstrap framework to generate word search puzzles.
- Deployed the JavaScript version to Azure cloud services, demonstrating proficiency in cloud services and web development.

Word API (GitHub)   Aug 2022
- Designed and developed a RESTful web API with Java Spring Boot framework.
- Implemented an API endpoint to provide random words based on user preference, with storage in a MySQL database.
